ABOUT THE SCHOOL

Babsolut Computer School is a division of Babsolut Compuworld. It was founded in 2001. The basic and fundamental goal of the establishment is to reduce or put a stop to the rising illiteracy in computer most especially Nigeria. Our aim about the training is to teach the fundamentals of computer science and its application as a means of information and technology.

OUR VISION

Illiteracy does not only concerns how to read and write. The complete form of literacy is to be able to read, write and have computer knowledge.
To put a total freeze to computer illiteracy and we have the commitment towards getting the entire nation groomed in computer awareness.

This vision has been our driving force because everything surrounding us is computerized, so how do we cope with all these if we do not learn and blend with the global trend.

WHY DO YOU NEED THIS TRAINING?

Do you know that, no matter the qualifications and titles you may have acquired, without computer knowledge, such qualifications and titles remains weak, and equal to zero or nothingness. We are now in computer age in which everything surrounding us is computerized. This computer education is very important so as to backup the effectiveness of our qualifications or titles.
In case someone do not have the chance or priviledge to know about computer, probably because of unavailability of computer, lack of opportunity, and so on, there is still an opportunity around the corner. You can earn yourself certificate in computer studies in no time.

WHAT IS THE END PRODUCT OF THIS TRAINING?

After this training, each student should be able to do one or more task on the computer. Tasks such as Document preparation, Printing, Designing, general computing performance, presentation, Etc. Our students can build his/her career based on our training.

REGISTRATION

Interested candidate should come down to our administrative office for more enquiries about the courses to be taken. Such student must be duely registered before the commencement of lecture. Candidates are to pay a non-refundable fee for registration which includes some of the study materials and kit. After registration, the tuition is to be paid. The student will then be bonafide student when all these things had been done.

EXAMINATION

Examination shall be conducted on every program offered. Students need to prepare very well for this because this guarantees advancement and need for certificate.

AWARDS

When a student has successfully passed through the programs in the scheme, such student will be awarded a Certificate in their respective courses.

RULES & REGULATIONS

✏The major rule is to be calm in the computer room.
✏There must not be physical conflict, which calls for expulsion.
✏Students are not allowed to bring in visitors into the computer room.
✏Students must be disciplined and must obey the tutors.
✏Student must bring along their computer books
